## Indigo

Congratulations and thank you for purchasing the Indigo Fuzz Pedal!

The Indigo Fuzz was the result of simply wanting to create a fuzz that has the tonal qualities of a great germanium based fuzz without the inherent problems that occur with germanium based fuzzes. Those problems include; inconsistent performance because of temperature stability; deterioration over time because of the nature of germanium; PNP design making the use of a power supply problematic, and, possibly the most important fact: there simply aren't many quality NOS germanium transistors left!

The Indigo has great tonal depth with a moderate amount of gain that does not mush out or get uncontrollable. It stays tight allowing chord detail to ring out true. The Indigo is a fuzz broadens the useful envelope of what a fuzz can do and adds a distinct character to rhythm and lead work.

### The Controls

*Volume:* sets the overall output volume.

*Fuzz:* sets the overall amount of fuzz. As the fuzz control goes up, the Indigo stays tight and focused on the lower strings.

Generally, most players will find that the fuzz control works best at or close to maximum.

*Tone:* The neutral tone position is at approximately 10 o'clock. The tone control affects a very specific range of frequencies and can be thought of a presence control to tailor the fuzz to a particular guitar's pickups and amp.

*On/Off Switch:* True Bypass.

*9v DC Input:* standard polarity tip negative/barrel positive barrel jack - works with regulated DC battery eliminators. This DC Input is also electrically protected from an reverse polarity connection.

(9v battery included). If you use a battery eliminator, the internal battery connection is mechanically and electrically disconnected from the circuit.

If you are only using battery power, disconnect the input jack when not in use so as not to drain the battery!

The internal adjustments are set at the factory and are not user adjustable.

If you are only using battery power, disconnect the input jack when not in use so as not to drain the battery!

### LIMITED WARRANTY

Each pedal comes with a Limited one-year Warranty. This warranty covers all manufacturing defects and parts. Abuse and normal wear and tear is not covered. This pedal is not user serviceable and any evidence of circuit tampering or modification will void the warranty.
