

Jetter Gear Red Square

The Red Square was a pedal that I procrastinated in building for quite some time. I had received many requests to incorporate the Red Shift into a dual pedal. What finally got me to do it was a request from an guitarist that I admire and respect tremendously. When I told him my idea, he simply told that I need to "Get this pedal done! Now!"

The Red Square concept is simple: Combine a Red Shift and a Helium in an enclosure the size of the Jetdrive.

I have always felt that the Helium is a perfect stacking pedal and with the Red Shift, it is simply amazing. It is a seamless integration that just keeps providing tone, tone and more tone!

The Red Shift Side:

When the Red/Shift is in the Red position, the pedal is operating 100% as it's predecessor, the Gain Stage Red. Flip the switch to Shift and a complete re-voicing of the pedal takes place. We incorporated all the goodness of the fat, woody and aggressive tone of the Gain Stage Purple-- in other words, voiced like a vintage aluminum panel Super Lead.

The Helium Side:

The primary design goal of the Helium was to achieve a natural, organic low-gain performance . Specifically, we tweaked the Helium with more harmonic contrast and we squeezed a bit more piano-like bass performance out of it. The Helium allows the guitar signal to be reproduced with startling transparency without sterility or stridency.

On/Off Switch: True Bypass.

9v DC Input: standard polarity tip negative/barrel positive barrel jack - works with regulated DC battery eliminators. This DC Input is also electrically protected from an reverse polarity connection.

(9v battery included in pedal). If you use a battery eliminator, the internal battery connection is mechanically and electrically disconnected from the circuit.

If you are only using battery power, disconnect the input jack when not in use so as not to drain the battery!

LIMITED WARRANTY

Each pedal comes with a Limited one-year Warranty. This warranty covers all manufacturing defects and parts. Abuse and normal wear and tear is not covered. This pedal is not user serviceable and any evidence of circuit tampering or modification will void the warranty.

For repairs or information email support@jettergear.com.
